Can he stay away from a determined life to pinch? It's all up to you! FOLLOW US Page 2 FOLLOW US Download Rescue Cut - Rope Puzzle Mod Apk 2.1.2 (Unlimited Money) for Android. Rescue Cut is a very interesting puzzle game from the F.I.L Games that challenges you to save a roof-bound boy by cutting wires to save him. When released, this person runs straight to the exit. The bad guy kidnapped the boy and tied him to the ceiling. Find a way to cut the rope and lead the boy to a safe escape in this intellectual game Avoid all enemies and try not to hurt the boy in any way. You think you can save him on all 50 levels? Like many puzzle games like Slingsters, World Hardest Game or Expedition Go, although the initial levels are simple, the difficulty increases when you go higher. The real challenge of Rescue Cut for Android is the order you approach to cut different ropes. Should we cut the cord immediately? Or find a way to eliminate the first trap? Would he dance on the floor if there were thorns in the ceiling? These are all difficult decisions that you have to make in the game, which greatly adds to Rescue's difficulties. A solid puzzle game on your mobile phone allows you to push your brain to the limit without really needing to get up and do anything physical. Who needs Sudoku when you have an extremely interesting alternative to puzzle games on your phone? Rescue Cut – Rope Puzzle is one of our favorite games right now. It's as simple as that and yet so addictive! The goal of the game is to free a little man from slavery and help him escape from the room where he is held captive without being eaten by a bear or shot by gangsters. Sounds more exciting, doesn't it? Be careful though – if you cut the rope at the wrong time, you won't stop enemies trying to kill you. The goal of the game is to cut the rope at just the right time to make sure you can beat the bears and gangsters by placing them in each other and not in you. This means that you need to focus and pay special attention to the details. You'll find quite early on that this game is actually much harder than it looks and that moving forward at every step requires a lot of patience and practice. Tips for playing Rescue Cut - Rope Puzzle If you're going to be successful in this game, you should pay attention to some top tips so you don't get frustrated in the early stages. This is a game of patience and caution – carefully assess the area around you and find out if there is something holding while the rope is hanging on you. Your captors won't let you off easy. Just be careful. Often comes a trap held together on your rope. This means you can capture the bears and gangsters who will kill you before they get the chance. Use these traps wisely, but make sure that you don't just fall into the trap of yourself – be patient and wait for the enemies to move so that you can decide the most effective way to capture them. Sometimes you can use the laws of physics to your advantage. The game follows these logical laws so that your character can use ropes to swing over obstacles if you cut them correctly. Pay attention to all possible ways you can help your character escape. Be careful with the boosters. Sometimes you see a special booster – often a spring that allows you to jump across the room. These may be necessary for escape, but sometimes they are harmful. For example, sometimes there are spikes in the ceiling and the spring just throws you into them... Not very helpful, after all. You're going down the slopes. Your character can't climb the slopes – he can just fall into them. So be careful not to land on the slope if you try to get around them. This can mean that you need to swing and cut the rope at the opposite moment to guarantee that your character can escape easily and is not just bear food.
